Climate Change Policy

UAC Global Public Company Limited and its subsidiaries & affiliates recognize the significance of climate change and its impacts on the environment, economy, and society. The Company is committed to reduce greenhouse gas (GHG) emissions from the its business activities, with the goal of achieving Carbon Neutrality from the operations by 2030 and Net Zero GHG emissions by 2050. To ensure effective implementation and achievement of these targets, the Company has established the following guidelines:

- 1. Compliance** Adhere to all applicable laws, regulations, requirements, policies, and practices related to climate change management. The Company aims to meet voluntary GHG reduction targets in accordance with international standards, specifically the Science Based Targets initiative (SBTi), to help limit global temperature rise to no more than 1.5°C.
- 2. GHG Data Management** Collect and calculate both direct and indirect GHG emissions in line with internationally accepted standards. This data will be used to improve operational efficiency, monitor performance, and report emissions from direct activities (Scope 1), indirect emissions from energy use (Scope 2), and other indirect emissions (Scope 3).
- 3. Emission Reduction Measures** Implement measures to reduce GHG emissions, such as minimizing energy and fossil fuel consumption, reducing paper usage, and managing waste to reduce landfill. The Company will also engage stakeholders to promote the adoption of these measures throughout the business value chain.
- 4. Promotion of Renewable Energy** Encourage the use of renewable or clean energy within the organization to support the Company's GHG reduction plan.
- 5. Communication and Engagement** Promote awareness, understanding, and participation among employees in reducing GHG emissions from operations. The Company will also disclose its performance to business partners and all relevant stakeholders.

This policy is hereby announced for acknowledgment and compliance.
